

NEIGHBORHOOD MAP

Take a walk and note the buildings and landmarks that are in your neighborhood.

Print and cut out these landmarks to add to your map. You can also use household items to create stencils (cutting apart empty cereal boxes works great), or cut kitchen sponges into building shapes and use with paint to do a stamping activity.

Take your map on a walk and have your child copy the name of the park, home, or business onto their map. Get creative and use blocks, Legos, or other toys to create a neighborhood of their own!
