

STARRY NIGHTS

**AUGUST 2025**

## HOW TO USE THIS MAP

MPM's star map shows the night sky as it appears on various dates and times. It is designed to be held above your head. Compass directions are indicated along the edge of the circle. Turn the map around its center so the compass direction that appears along the bottom of the map is the same as the direction you face.

## BEST VIEWS

August 1 at midnight;  
August 15 at 11 p.m.;  
August 31 at 10 p.m.  
Best to use the chart within an hour of the times listed. This chart is drawn for 43 degrees latitude but may be applied throughout the continental USA.

## AUGUST MORNING SKY

Watch bright Venus pass bright Jupiter from August 11 to 14. Saturn can be seen in the southwest sky.
