HOW TO USE THIS MAP

MPM's star map shows the night sky as it appears on various dates and times. It is designed to be held above your head. Compass directions are indicated along the edge of the circle. Turn the map around its center so the compass direction that appears along the bottom of the map is the same as the direction you face.

BEST VIEWS

December 1 at 9:00 p.m., December 15 at 8:00 p.m., December 31 at 7:00 p.m. Best to use the chart within an hour of the times listed. This chart is drawn for 43 degrees latitude but may be applied throughout the continental USA.

Milwaukee Public Museum

DECEMBER MORNING SKY

Look for the Big Dipper high overhead and Leo high in the south. You can spot Mars low in the west sky.
