

HOW TO USE THIS MAP

MPM's star map shows the night sky as it appears on various dates and times. It is designed to be held above your head. Compass directions are indicated along the edge of the circle. Turn the map around its center so the compass direction that appears along the bottom of the map is the same as the direction you face.

JANUARY MORNING SKY

Catch Venus, Moon and bright star Antares low in the SE morning sky from January 7-9. See big dipper high overhead. Then use the handle to "arc to Arcturus" and "speed on to Spica."
