

HOW TO USE THIS MAP

MPM's star map shows the night sky as it appears on various dates and times. It is designed to be held above your head. Compass directions are indicated along the edge of the circle. Turn the map around its center so the compass direction that appears along the bottom of the map is the same as the direction you face.

BEST VIEWS

July 1 at 11:30 p.m., July 15 at 10:30 p.m., and July 31 at 9:30 p.m. Best to use the chart within an hour of the times listed. This chart is drawn for 43 degrees latitude but may be applied throughout the continental USA.

JULY MORNING SKY

Look for the Moon to pass Mars and Jupiter twice: July 1-3 and again July 30-31! Get up early and gaze low in the east sky.
