HOW TO USE THIS MAP

MPM's star map shows the night sky as it appears on various dates and times. It is designed to be held above your head. Compass directions are indicated along the edge of the circle. Turn the map around its center so the compass direction that appears along the bottom of the map is the same as the direction you face.

BEST VIEWS

March 1 at 9 p.m.,
March 15 at 9 p.m., and
March 30 at 8 p.m.
Best to use the chart within
an hour of the times listed.
This chart is drawn for
43 degrees latitude but
may be applied throughout
the continental USA.

MARCH MORNING SKY

See a total lunar eclipse on Tuesday,
March 3, 3:50 a.m. to 6:27 a.m. — if clear!
The Summer Triangle shines high in the
east and the Big Dipper is high in the
northwest.
